## Education

| | |
|---|---|
| 2015–2019 | Master of Science in Economics, University of Copenhagen<br>Thesis: "Dynamic residential sorting – A register based analysis of households' willingness to pay for job density"<br>Advisors: Bertel Schjerning & Anders Munk-Nielsen |
| 2013–2015 | Bachelor of Arts in Philosophy, University of Copenhagen<br>Thesis: "Menneskets Fri Vilje – Neurovidenskab og et klassisk filosofisk problem"<br>Advisor: Jan Faye |
| 2010–2015 | Bachelor of Science in Economics, University of Copenhagen<br>Thesis: "Priselasticiteter i udenrigshandlen – En økonometrisk analyse af priselasticiteten for danske branchers eksport"<br>Advisor: Heino Bohn Nielsen |

## Positions

| | |
|---|---|
| 2023– | PhD Fellow, Department of Economics, Copenhagen Business School |
| 2016–2018 | Research Assistant, Department of Economics, University of Copenhagen<br>Worked for Bertel Schjerning on the URBAN project |

## Research

**The Geography of Careers** *Work in progress*

This paper studies job search across geography and occupations. Using matched employer–employee data for Denmark (1995–2019), I document that worker flows decline sharply with both geographic and occupational distance. I extend a spatial search framework by introducing an occupational dimension: job offers are characterized by a triple of location, occupation, and wage, and offer arrival rates decline with distance in each dimension. I estimate the structural job search model and use the framework to evaluate how these frictions shape unemployment rates and wage growth across local labor markets.

**Local Labor Matching** *Work in progress*
*Joint with Daniel Borowczyk-Martins and Annaïg Morin*

There are large and persistent differences in unemployment rates across local labor markets. Motivated by that observation, we study differences in matching efficiencies across local labor markets. We use panel data on local labor markets from the United States to estimate the local matching efficiencies and find substantial variation. We examine how this heterogeneity correlates with observable characteristics of local labor markets, including industrial composition, worker demographics, and urban density.

## Teaching

| | |
|---|---|
| 2024 | Teaching Assistant, Macroeconomics, Copenhagen Business School |
| 2018 | Teaching Assistant, Advanced Microeconometrics, University of Copenhagen |
| 2017–2023 | Teaching Assistant, Econometrics II, University of Copenhagen |
